**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

This is the first Office Action for application number 10/520,476, Device for Fixing an Object on a Vertical Rod, filed on 9/15/05. Claims 1-19 are pending.

***Affidavit under 1.132***

The affidavit filed under 37 CFR 1.132 dated 1/18/05 with regards to the translation is acknowledged.

***Information Disclosure Statement***

The information disclosure statement submitted on 5/25/05 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

***Claim Objections***

Claims 6-19 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim depends from another multiple dependent claims which is improper. See MPEP § 608.01(n). Accordingly, the claims 6-19 have not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites a "second fastener" which appears to be the same as the "first fastener" as recited by claim 1.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 5641141 to Goodwin.

The patent to Goodwin discloses a device for fastening an article to a primary support, the device comprising a rod (120) having a cylindrical body and at least a first (112) fastener arrangement for fastening the article to the body of the rod in releasable manner and in a position that is adjustable along the rod, the device being characterized in that the first fastener arrangement comprises a first assembly part (first half of 112) presenting two branches (114) suitable for placing on either side of the body in such a manner as to hold the first assembly part in place on the body by friction, with it being possible for the part to be slid manually in a longitudinal direction to a selected position along the body, and a second assembly part (second half of 112) suitable for being

secured to the first assembly part with the branches being clamped against the body in such a manner as to lock the first assembly part in the selected position and a second fastener arrangement (152, See Figure 5 which shows dual assembly part being used) for fastening the rod to the primary support in a vertical orientation, the second fastener arrangement comprising a first assembly (same as above) part having two branches suitable for placing on either side of the body in such a manner as to hold the first assembly part in place on the body by friction, and a second assembly part suitable for being secured to the first assembly part with the branches being clamped onto the body in such a manner as lock the first assembly part in position, in which the rod has an integrally formed head (136) at its top end that is of section greater than that of the body wherein the first assembly part assembly part of the first arrangement and the first assembly part (4) of the second fastener arrangement are interchangeable.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
